

YETI SOFT COOLERS - GOOD TO KNOW

DAYTRIP LUNCHBAG AND BOXES

IS IT EASY TO CLEAN?

Yes, use a cloth or towel and a mix of mild dish soap and warm water. For stubborn stains, hose it down - it can handle it. When you're done, let it dry and store it away until your next day trip.

ARE THE LUNCH BAG AND LUNCH BOX WATERPROOF?

Both the insulated lunch bag and box have a water-resistant exterior that will keep your contents dry through splashes, drizzles, or if in the path of a spilled drink.

WHAT ICE PACK IS RECOMMENDED?

We recommend the medium YETI THIN ICE™ to make your food and drinks stay colder for longer without messy cleanups later.

IS THE LUNCH BOX RIGID?

It's rock-solid in a good way. Unlike other insulated lunch boxes with soft exteriors, it can't be compressed so your food won't get crushed. Meanwhile, our thermal insulated cooler bag is soft and compressible for anyone needing to save space after chowing down.

IS THE MATERIAL ON THE INSIDE FOOD SAFE?

Absolutely. Fruits and subs can rest directly on the inside material, saving you from taking up space with unnecessary food containers.

YETI HOPPER COOLERS

WHAT SIZE SHOULD I BUY?

These coolers are engineered for portability. Ultimately it depends on how much you want to pack. For example, the insulated backpack cooler is ideal for unsteady terrain or getting there on bike.

IS IT EASY TO CLEAN?

Yes, use a mixture of mild dish soap and water with a gentle cloth for the interior, exterior, and zipper. Be sure to fully air dry before zipping closed and storing.

WHAT ACCESSORIES ARE AVAILABLE FOR MY SOFT COOLER?

The Hitch Point™ Grid makes it easy to accessorise your soft cooler. Fasten bottle openers, carabiners, or the Sidekick Dry® Bag.

HOW LONG WILL IT KEEP ICE?

Our soft coolers provide serious cold-holding power. But since every adventure is different, we can't give an exact timeframe.

ARE THESE PERSONAL COOLERS DRY ICE COMPATIBLE?

No. The zipper is airtight and would not allow proper ventilation, which could cause the cooler to explode. Check out our Yeti Roadie® and Yeti Tundra® Hard Coolers if you need to use dry ice.

HOW MANY CANS WILL IT HOLD?

With an ice-to-contents ratio of at least 2:1: The Hopper Flip® 8 can hold eight cans, the Hopper Flip® 12 can hold 13 cans, and the Hopper Flip® 18 can hold 20 cans.

WHAT IS THE BEST WAY TO APPLY THE ZIPPER LUBRICANT TO MY PERSONAL SOFT COOLER?

After cleaning and removing debris from your zipper, apply a thin layer of lubricant to the front and back surfaces of the top seal and adjoining teeth, then wipe away any excess product.

HOPPER M20 & M30 COOLERS

WHAT OUTDOOR ACTIVITIES IS THE HOPPER® M20 BEST FOR?

The M20 cooler is perfect for anywhere you need your hands free and your drinks cold. Take it to the beach, the crag, a day on the lake – it's got your back.

The M30 cooler is great for hauling refreshments for several people for an entire day out in the wild. For example, a beach outing with a group, a road trip meal, or a picnic at the campsite.

HOW MANY CANS CAN FIT IN HERE?

Hopper M20 Using a 2:1 ice to cans ratio, you can fit 18 regular-sized cans in the Hopper. For the Hopper M30 26 cans of beer using the 2:1 ice-to-can ratio by volume.

WHICH YETI THIN ICE WORKS BEST WITH THIS COOLER?

We recommend using the large YETI Thin ICE™ with the Hopper® M20 and M30, which is optimised for soft coolers.

HOW SHOULD I CLEAN THIS COOLER?

Rinse with fresh water and soap, thoroughly drying the inside with a cloth or paper towel. Make sure you wipe down the MagShield Access opening to remove any dust or grime. A sponge or a non-abrasive rag will help with tougher stains or marks. To thoroughly dry your Hopper® soft cooler, leave open and flip upside down.
