

## YETI RAMBLER MUGS - GOOD TO KNOW

### WHAT IS THE DIFFERENCE BETWEEN THE MUGS?

To name a few, customers love using the 14oz mug as a camp bowl; the 10 oz Stackable Mug has nesting capability and the 20oz Travel Mug has its own unique lid

### ARE THE LIDS INTERCHANGEABLE?

Yes and No. The 20oz and 30 oz Travel Mug with StrongHold Lid are unique in that the mug and cap are designed for each other. Other mugs and MagSlider Lids are interchangeable but size dependent.

### HOW IS A MUG DIFFERENT FROM A BOTTLE?

Tumblers are great for all drinks on-the-go, but aren't meant to be packed as the lid will leak. Bottles and their caps can create a leakproof seal but aren't meant for carbonated or perishable beverages.

### WILL IT FIT IN MY CUPHOLDERS?

Yeti Rambler Travel Mugs with Stronghold Lids are your go-to for mugs to take along. Available in 20oz and 30oz sizes

### IS IT DISHWASHER SAFE?

Yes. We recommend lids on the top rack, and gaskets in the utensil's basket. Of course, you can always hand wash, but we know you're busy on your next adventure.

### HOW LONG WILL MY RAMBLER KEEP ICE?

Due to all the variables that can affect ice retention, we can't guarantee a precise amount of time that your Rambler will hold ice. However, more ice is better when it comes to your Rambler Tumblers or Bottles. We suggest filling your Rambler with as much ice as possible.

### CAN I USE THE MUG FOR HOT AND COLD DRINKS?

Yes – vacuum insulation in these Yeti Rambler® Mugs will keep cold drinks cold and hot drinks hot. Do not use Mugs with carbonated beverages or for storage of food or perishables.

### IS THERE A MAXIMUM TEMPERATURE LIMIT FOR HOT LIQUIDS WHEN USING THE RAMBLERS OR RAMBLER LIDS?

Yes, we recommend temperatures to not exceed the limits below when using the following Rambler drinkware items and lids. Our Ramblers lock in hot temperatures, so please, always open carefully. Do not overfill. Hot liquids must remain below the solid ring located beneath the threads. Keep hot liquids out of reach of children. Maximum Temperature of 85C

### WILL MY RAMBLER LEAVE A WET RING ON SURFACES

No, YETI Ramblers are over-engineered, 18/8 stainless Mugs, Tumblers, Bottles, and Colsters®, designed with double-wall vacuum insulation and a No Sweat™ Design.

### HOW DURABLE IS YETI DRINKWARE?

Rambler drinkware has fallen off trucks, down rocky hillsides, and even been kicked by a horse and lived to tell the tale.
